Dear sir:

This a letter of confirmation for your report on our "Courtesy Broadcast" on the morning of Jan. 18. According to my log your report is accurate.

The weather here at the time of Broadcast was cloudy with occassional showers with the temperature about 36 degrees. I was especially pleased to hear from your state of Pennsylvania.

All equipment here is Gates, including: Gates BC-1F, 1KW transmitter, and SA-40 console, all of which have given satisfactory operation.

Winder is a small town with about 5000 population located about 47 miles northeast of Atlanta. Main source of income is thru numerous factories producing clothes, shoes etc. There's also a considerable amount of broiler raising.

Once again thanking you for your fine report, I remain,

William R. Powell
Chief Engineer
